

MEGA MILLIONS® ENHANCEMENTS

The multi-state Mega Millions game will undergo changes starting April 5, 2025. The enhancements to the game, which also include a price increase to \$5, give players the chance to win even larger prizes at all levels. Key highlights include:

- Faster-Growing Jackpot
- Larger Jackpots and Secondary Prizes
- Better Odds to Win a Jackpot
- Increased Price Point includes Built-in Multiplier
- New Matrix
- Changes to Digital Playslips

PRICE POINT AND MULTIPLIER

Mega Millions tickets will now cost \$5 per wager and will automatically include the Multiplier feature. Players multiply non-jackpot wins by 2X, 3X, 4X, 5X, or 10X on every play.

Each play/wager/board is randomly assigned its own Multiplier and is displayed on the printed ticket.

NEW MATRIX

Players will select five different numbers from 1 to 70 (the white balls), but will now choose one number from 1 to 24 instead of 25 (the gold Mega Ball).

Players who match all six winning numbers in a drawing win the jackpot.

***The Multiplier does not apply to the Jackpot.

Mega Millions cannot be cancelled.

Along with the new game rules, Mega Millions is introducing a new, faster-growing jackpot which starts at \$50 million (instead of \$20 million). This also means that there are better odds to win the jackpot.

Jackpot odds improved from 1 in 303 million to 1 in 290 million.

Players will see bigger wins even in the lower-tier prizes. The minimum prize for a winning ticket is \$10, or 2X the price of the ticket.

WAVE UPDATES

The WAVE will receive an automatic download for the Mega Millions changes. The **Mega Millions** screen will reflect the price change and will not reflect a multiplier option.

The **Number Selection** screen will be updated to reflect the new matrix for the gold Mega Ball.
